Problem Statement

- Situational awareness is at an all time low
- Being more aware can help you in emergencies
- Our client has created awareness training in the past
- Poor scalability due to manual implementation

Proposed Solution: KIMinder360 App

- Automated directive reminders
- Flexible directive categories and reminder frequencies
- Hours of manual effort eliminated
- Offline availability for training anywhere

How KIMinder360 Solves Our Client's Challenges

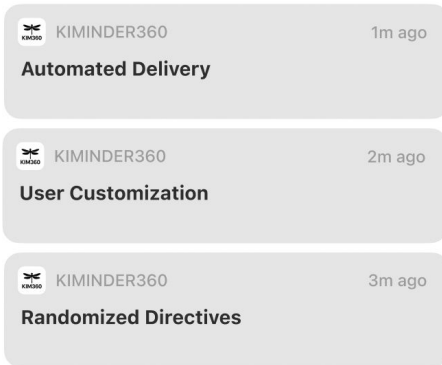

Before

One manual phone call per user,
same time every day, no
customization

After

Fully automated, personalized,
dynamic experience

Key Requirements

Domain-Level Requirements

- Automated situational awareness training
- User customization and scheduling
- Directive management and data handling
- Scalability and future growth

Performance Requirements

- System responsiveness
- Data management and storage
- Usability and user learning
- Performance efficiency

Functional Requirements

- Push notifications
- Category selection
- Database of directives
- Active hours selection

Environmental Requirements

- Hardware and platform constraints
- Software and development constraints
- External standards
- Operational environment

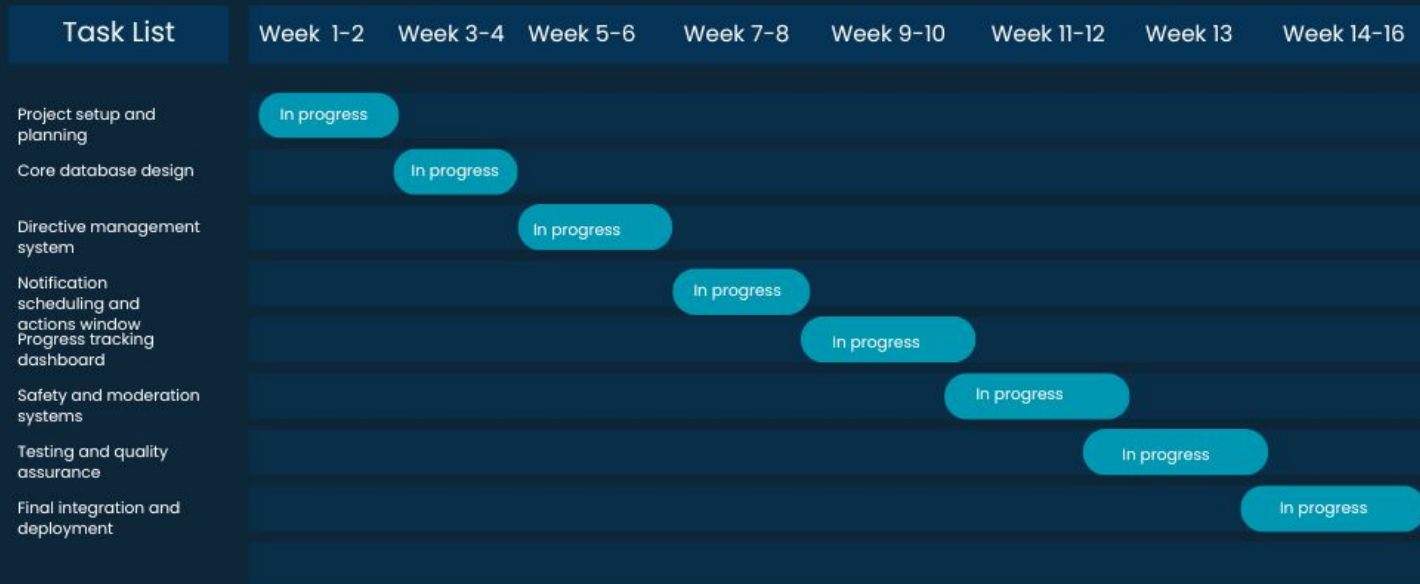

Risks and Feasibility

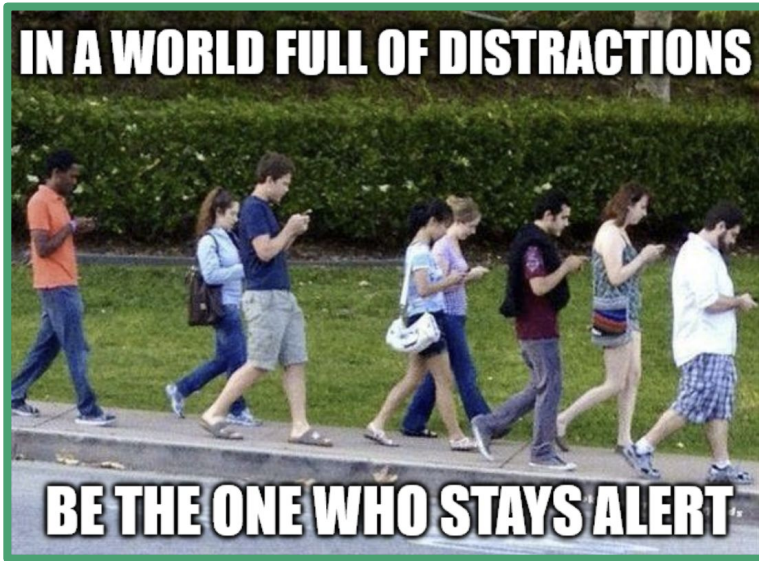

Schedule

Gantt Chart

Project Timeline
Spring 2026

Conclusion

- Fix scalability problem with a mobile app
- Reduce workload on our client
- Make awareness training more accessible
- Solution revolves around 4 key features

Thank You!
