Problem Statement

- Situational awareness is at an all time low
- People are less prepared for emergencies
- Our client has created awareness training in the past
- Poor scalability due to manual implementation

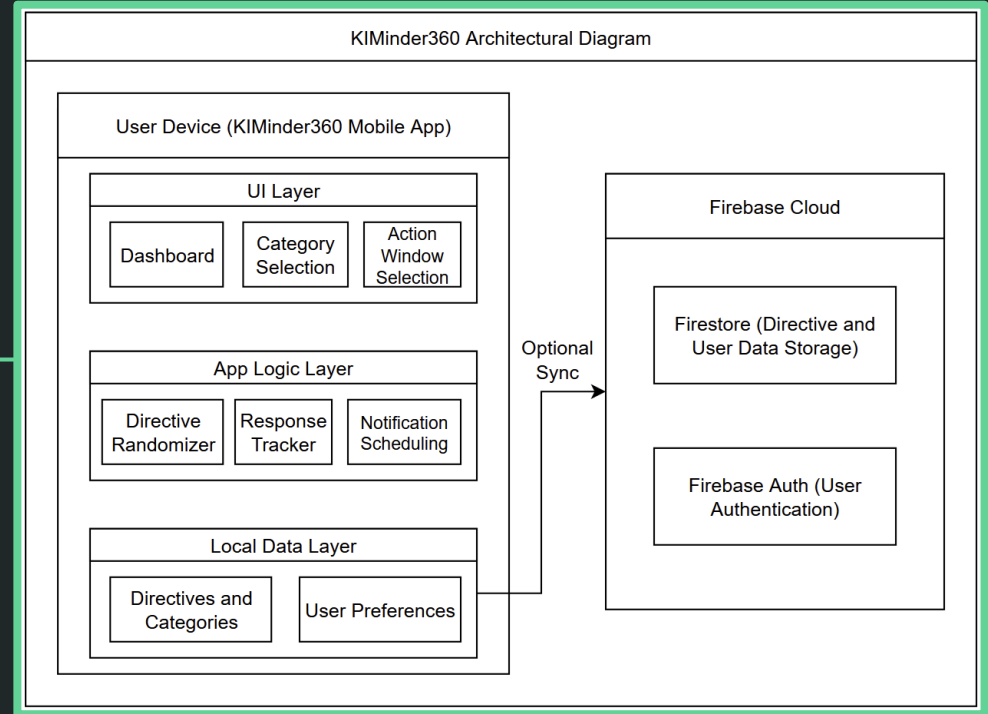

Solution: KIMinder360

- Mobile app that automates awareness training
- Allows for seamless scaling to many users
- Easier for everyday people to start awareness training

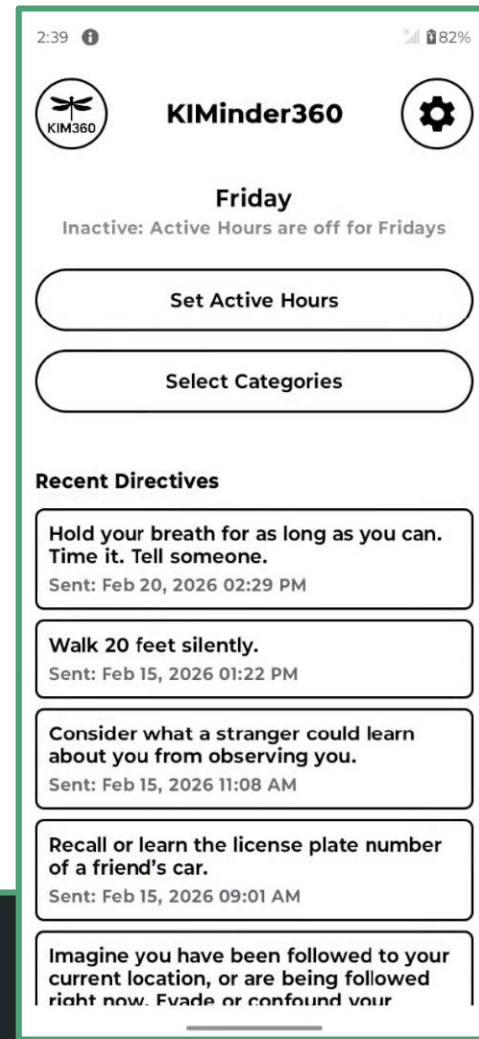

Software Design Overview

- Layered architecture
- Offline-first local storage
- Firebase for auth/data
- Optional cloud sync

Alpha Demonstration 1

1. Real Time Directive Scheduling
2. Directive Response and Interaction
3. User Customization

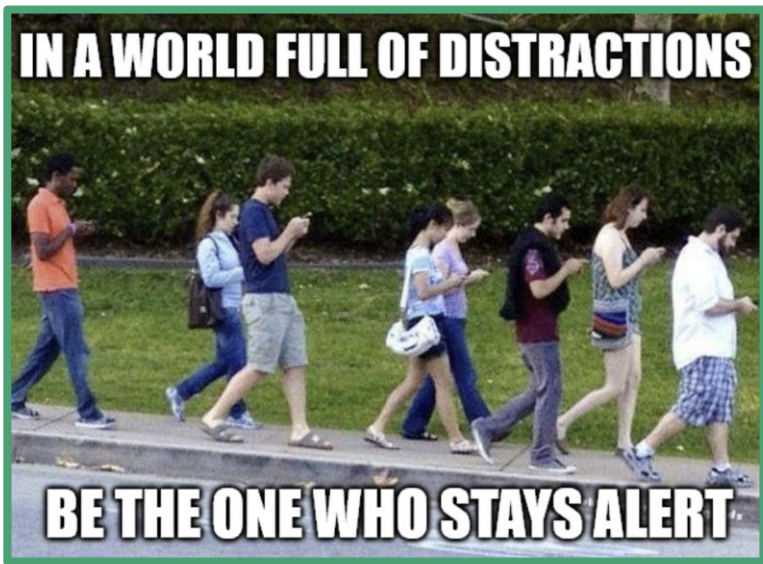

Challenges and Resolutions

- Splitting up work equally
- Figuring out how we truly want the app to function
- Beta testing
- Getting a testing device

- We accomplished all of our goals for the first phase
- Goals for our next phase of development

Conclusion

- Fixed scalability problem with mobile app implementation
- Reduced workload on our client
- Made awareness training more accessible
- Will continue to add to our feature set

Thank You!
