The Problem

- Situational awareness is at an all time low
- People are less prepared for emergencies
- Our clients previous solution faced scalability issues
- Poor accessibility due to manual implementation

The Solution: KIMinder360

- A revolutionary Mobile app that automates awareness training
- Allows for seamless scaling to thousands of users
- Starting awareness training is as easy as picking up your phone

Key Requirements

Gathering Process

- Client meetings
- Mentor meetings
- Observation of training program
- Feedback refinement

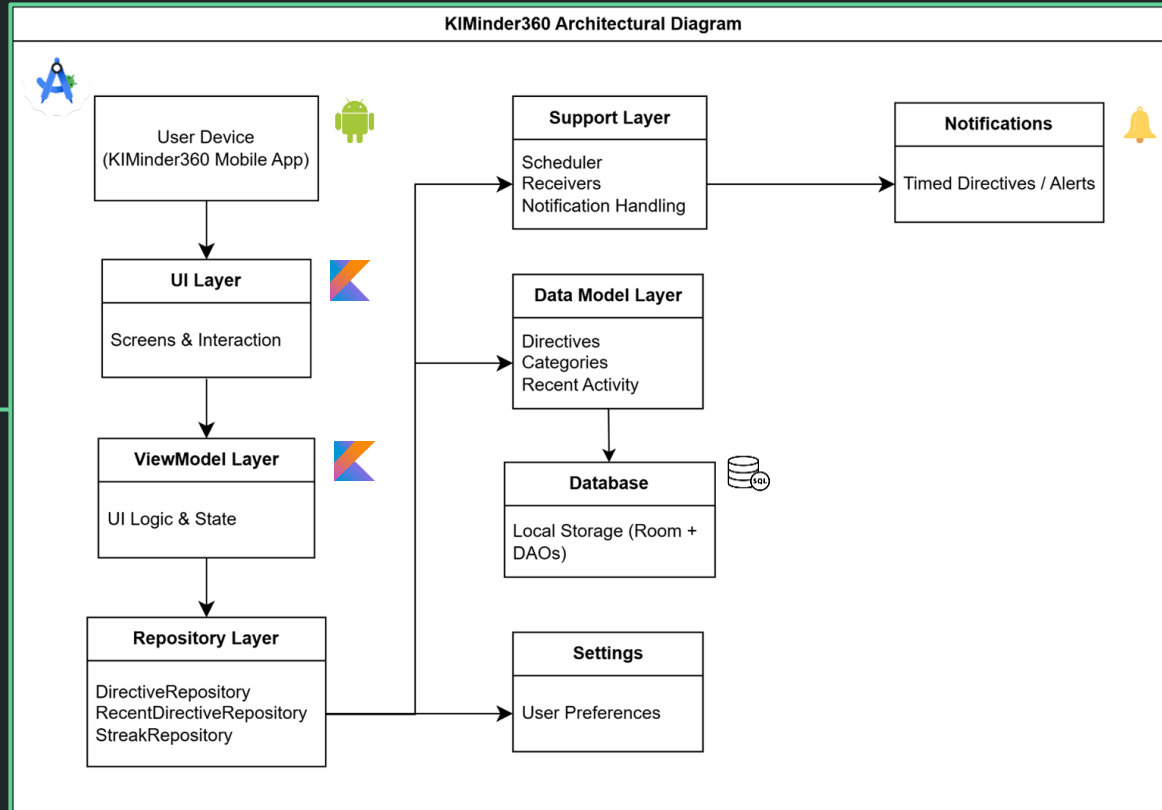

Collected

- Functional: notifications, scheduling, data handling
- Performance: responsiveness, usability
- Constraints: mobile platform, project scope
- ~25 total requirements

Requirements & Implementation

- Clear directives → Notification system
- Simple interaction → Minimal UI design
- Storage → Local database (offline-first)
- Timely responses → Logging & tracking

Architecture and Implementation

Testing Plan

TESTING TYPES

Unit

- Directives logic
- Scheduling behavior
- Response handling

Integration

- UI + database
- Notifications

Usability

- Directives are clear
- Easy interaction

01

WHAT WE TESTED

- Scheduling directives
- User responses
- Notifications & background tasks
- App navigation

02

DEVELOPMENT CYCLE

- Tested as features were built
- Retested after each fix
- Worked with ongoing feedback from client

03

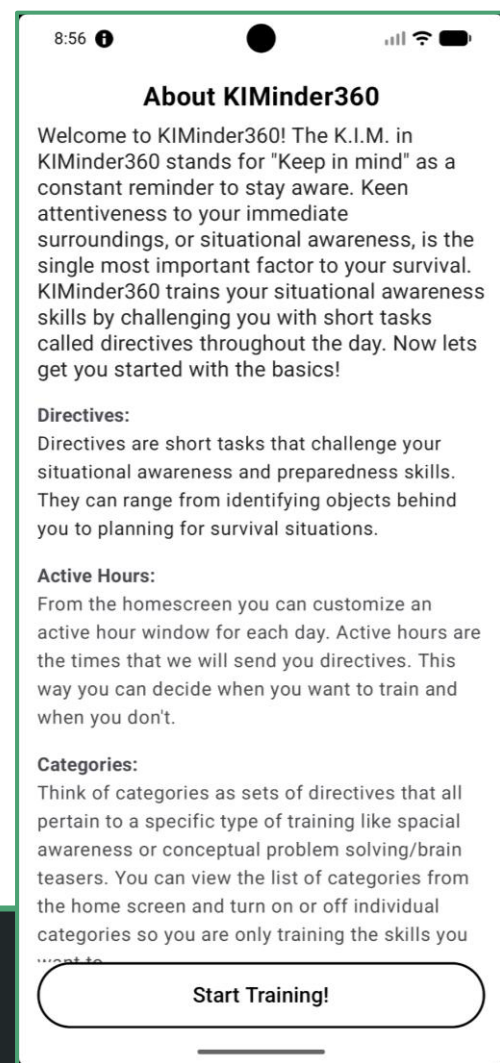

IMPACT / RESULTS

- Fixed issues early
- System is more reliable
- User flow is easier
- Aligns with user needs

04

Prototype Demonstration

- Walkthrough of full user experience
- Demonstration of core features:
Active hours, directive categories,
and personalized training controls
- Interactive directive management
- Customization through settings

Challenges and Resolutions

Challenges

- Front end development in android studio
- Learning android studio
- Deploying a beta testable demo

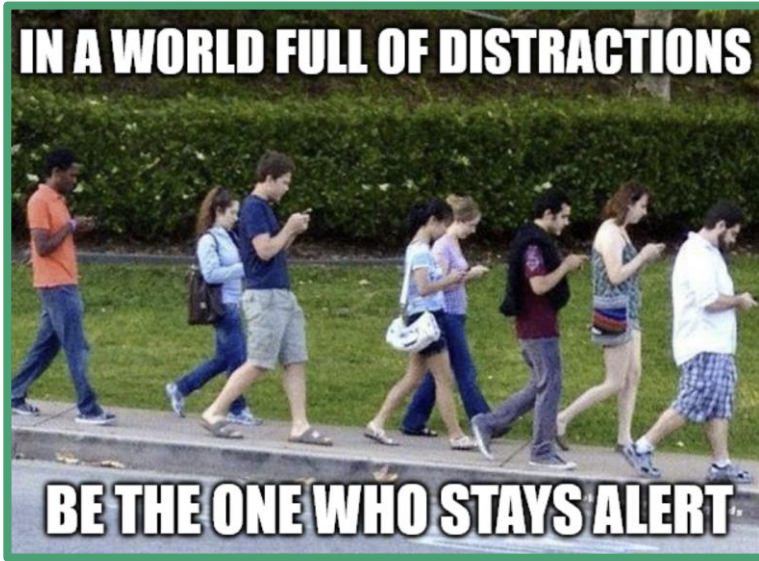

Resolutions

- Learned and practiced making themes
- Figured out the syntax of android studio with practice
- Worked with our client to develop an effective plan

Future Work

- Cross platform functionality through Kotlin multiplatform
- Firebase cloud functionality
- Add monetization functionality
- Enhance app gamification

Conclusion

- Created a functional app that is available for all android users.
- Worked with our client to implement the necessary app requirements
- Made awareness training more accessible
- Created the functioning groundwork for an awesome project

Thank You!
